

Teacher Education

A Swedish perspective

For Autumn semester, Kristianstad University will offer different packages of courses suitable not only for Teacher Education students but also for students with Sociological, Psychological and (Special) Educational interest. The courses are in English and are all related to pedagogical work and the idea of a school for all.

Kristianstad University

Kristianstad University is a modern university situated in southern Sweden. We offer top quality education with a strong focus on internationalization.

Teacher Education

Kristianstad University offers a wide range of programmes and courses for future and current teachers. We offer undergraduate programmes in pre-school, primary, secondary and post compulsory education.

Preschool and Primary Education

Swedish preschool is a place to grow for children between 1 and 5 years old. There is a focus on basic values such as playing together, tolerance and consideration for others. Outdoor activities are key and children play outside at every opportunity. Swedish childcare is affordable for everyone and today, some 80 percent of one- to five-year-olds attend preschool in Sweden. Preschool teacher education at Kristianstad University is based on basic democratic values, modern childhood and knowledge about individual children's learning and development. Exchange students have the possibility to both study courses and take part in a school placement.

Irene exchange student from Spain

"During my whole year as an exchange at Kristianstad University, I had the opportunity to enjoy the complete experience. This includes studying different courses that completed my knowledge for becoming a better teacher as well as the diverse activities that the university organised for us. Referring to my studies, the highlight of the courses that I studied here is the placement course for primary teachers. I did my internship in a Swedish school and this opportunity allowed me to see another style of teaching and open my mind. I will use this experience when I teach at schools in my country. Definitely, it was the best experience both in a professional and personal way."
